How Does Soberlink Share™ Work?

3 Simple Steps

Step 1
Participant receives scheduled test reminder

Step 2
Participant submits a breath test

Step 3
Recovery circle receive real-time BAC results via text and/or email

Key Feature: Facial Recognition Software

Modern Recovery Technology

Using suggested protocol published in the Journal of Addiction Medicine by an expert panel, participants will agree to test 2-3 times per day. The Soberlink Recovery System will send text message reminders for each scheduled test to the participant. After the breath test is completed, the system sends the results to the recovery circle by real-time text and/or email alerts.

The Benefits of Using Soberlink

For Participants
- Stay connected with your recovery circle
- Builds accountability and structure
- Documents sobriety

For Families & Treatment Providers
- Share in the recovery process
- Helps rebuild trust
- Peace-of-mind

Participant

Alcohol addiction is NOT a moral failing, addiction is a disease and therefore should be treated as such. Soberlink’s Share™ program is a way to monitor sobriety for long term success.
Soberlink Testimonials

“...helped me change my behavior and mindset, it also helped me keep in contact with people who support my recovery.”
— Soberlink Participant

“...Share™ program gave me the tool leaving treatment that I needed to stay accountable to my sobriety.”
— Soberlink Participant

Soberlink FAQs

How do I get started?
Get started online by visiting www.soberlink.com or call our toll free number at 714.975.7200.

How many times a day do I have to submit a breath test?
Soberlink encourages a simple schedule of 2 to 3 breath tests per day.

Is Soberlink covered by my insurance?
Soberlink is not currently covered by major health insurance carriers, but the Soberlink System does qualify for Flexible Spending Arrangement (FSA Reimbursement). Please check with your employer about your FSA program.

When Recovery Starts

Studies show the longer a person in recovery stays involved with consistent monitoring, the better the long term outcome.

Soberlink’s Share™ program delivers real-time blood alcohol results to people who support individuals in recovery. The visibility of the results strengthen their involvement and allow for timely intervention when necessary. Ultimately, these shared results are documented and promotes accountability.
